Chapter 1. Writing with localization in mind

Writing translation-friendly text

Learn a few tips to make your text easier to translate and less likely to cause translation errors.

Clarity

A text that is easy to understand is usually also easier to translate. To make your writing clearer, use these tips:

- Avoid overly long sentences and paragraphs.
- Repeat important words to avoid misunderstanding.

~~If the shaft of your wand breaks, you can get a new **one** online.~~

If the shaft of your wand breaks, you can get a new **wand** online.

- Don't describe more than one action in a sentence unless writing about strictly related actions.
- Use words such as "and," "then," "but," "a," "the," "this," and "that" to make your message clear.

Grammar

You can make your text easier to understand by using certain grammatical forms. To make your writing clearer, follow these rules:

- Express actions with verbs, not nouns.

~~Applying excessive force can lead to **rupture** of your wand.~~

If you apply excessive force, your wand can **break**.

- Use active voice.

- Split clusters of nouns into smaller logical units.

~~magic wand cleaning center~~

center for cleaning magic wands

Formating

Search your text for unintended linebreaks and punctuation marks (such as periods in place of commas). Translation tools may misinterpret such characters and split sentences into artificial units. This can lead to translation errors and inconsistencies.

Important:

When localizing a DITA project, always send the translators your source files rather than the output, for example PDF or HTML files.
